

# FROM THE SECRETARY

We hope you've noticed the new address label on your Bulletin. It was prepared to be run on equipment available at the print shop in Memphis.

The label contains both your name and address and your membership number. Please check the label carefully and if there is an inaccuracy, notify the secretary at once. He'll make sure the proper people get notified and the records get straightened out.

From Denmark comes word of a new Perfin.. or really an old Perfin with a "life" of its own finally.

The Perfin is the GK, as illustrated below, which originally was made for Gentofte Kommune, the municipality of Gentofte, which is a suburb of Copenhagen.

But the town fathers were not happy with the perforator, which could handle only one stamp at a time. So they returned it and got instead a machine which can punch ten sheets at a time and ten stamps across!

The unused GK (which differs slightly from the 10-head machine) remained unused until it was acquired by our member Peter Englebrecht, who calls himself the "old collector," which is in Danish "den Gamle Kollektor."

Peter, incidentally, will supply an example of his Perfin to anyone who writes and asks. His address is 11 Hindballevej, 5466 Asterup, DENMARK. When you write, it would be appropriate to send along an IRC or an equivalent amount in U. S. postage to offset the expense of replying.

Jacob Kisner (750 Park Avenue, New York 10021), whose KIS/NER Perfin is used often on issues of the Park Avenue Local Post (see Bulletin, March 1979), reports that he has found eight Finnish parcel cards with ASEA (for Allmanna Svenska Electric AB) Perfins on the attached stamps. He'll send one of the cards along for \$2.00 plus 30¢ postage. And if you ask, he'll surely use one or more of his KIS/NER Perfins on the envelope. These parcel cards turned up in the same mix that yielded the FORD Perfins Kisner offered earlier.
